

Foxtrot

Foxtrot Food Company Sustainability Policy

Foxtrot Food Company is committed to protecting the environment and promoting the sustainable use of resources in everything that we do.

We recognise the impact that energy use and waste generation is having on the world around us and apply sound practices to minimise our impact and those of our customers.

Our sustainability policy is based on the following principles;

- We produce home-made, freshly baked fine food using the best quality ingredients, locally sourced wherever possible to minimise transport distances and to support our fellow local businesses.
- Wherever possible we source organic ingredients for our food.
- We utilise as much biodegradable material in our food packaging as possible.
- We ensure that all non-biodegradable packaging is recyclable, and we package our food taking care not to mix materials and reduce their recyclability.
- We seek to work with other similarly minded and environmentally responsible bodies wherever we can, including suppliers, retailers and of course you, our customers.
- We provide clear labelling on our packaging to help you make informed decisions about its recycling.
